

Anupam Raj

Full Stack Developer — MERN Stack — React Native Developer

✉ anupam.r2301@gmail.com — 📞 +91-83401 93910 — 📍 Patna

🌐 Portfolio — 🌐 GitHub — 🌐 LinkedIn

PROFESSIONAL SUMMARY

Full Stack Developer specializing in MERN Stack and React Native application development. Experienced in building scalable web applications, RESTful APIs, authentication systems, and database-driven applications using React.js, Node.js, Express.js, MongoDB, PostgreSQL, and Prisma ORM. Skilled in developing cross-platform mobile applications using React Native, Expo, Firebase, and NativeWind. Strong understanding of frontend architecture, backend API development, database modeling, state management, and responsive UI development.

TECHNICAL SKILLS

Frontend: React.js, React Native, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, NativeWind, Responsive Design, Context API

Backend: Node.js, Express.js, REST API Development, MVC Architecture, Middleware, API Security, Swagger Documentation

Databases: MongoDB, Mongoose, PostgreSQL, Prisma ORM, Firebase Firestore

Authentication & Security: JWT Authentication, Role-Based Access Control (RBAC), Firebase Authentication, Session Management

Tools & Platforms: Git, GitHub, Postman, Swagger, Docker Basics, Vercel, Render, Expo

PROJECTS

OptiPIN – Social Media Web Application

React.js, Node.js, Express.js, MongoDB, Cloudinary

Live Demo — GitHub

- Developed a Pinterest-inspired social media application using React.js, Node.js, Express.js, and MongoDB.
- Built reusable React components, managed application state, and created responsive user interfaces.
- Implemented JWT authentication, protected routes, and backend middleware for secure user operations.
- Integrated Cloudinary for optimized image upload, storage, and media management.

Question Answer Platform API

Node.js, Express.js, PostgreSQL, Prisma ORM

API Docs — GitHub

- Designed and developed a scalable REST API using Express.js, PostgreSQL, and Prisma ORM.
- Created relational database schemas with optimized queries and structured data relationships.
- Implemented Role-Based Access Control (RBAC) for secure authorization across application resources.
- Created Swagger API documentation for easier testing and frontend integration.

Digital Payment Platform API

Node.js, Express.js, MongoDB, Mongoose

API Docs — GitHub

- Built a backend payment management system handling users, transactions, and account balances.
- Designed modular APIs using Express.js with authentication and validation middleware.
- Used MongoDB aggregation pipelines for transaction analytics and financial insights.
- Implemented JWT authentication and secure API communication practices.

TableIO – Restaurant Booking Mobile Application

React Native, Expo, Firebase

GitHub

- Developed a cross-platform restaurant booking application using React Native and Expo.
- Integrated Firebase Authentication and Firestore for real-time booking management.
- Implemented Context API for global state management and efficient data handling.
- Designed responsive mobile interfaces using NativeWind styling framework.

EDUCATION

Bachelor of Computer Applications (BCA)

2022 – 2025

Dev Sanskriti Vishwavidyalaya, Haridwar

CGPA: 8.26/10
