

Anupam Raj

Full Stack Web Developer

✉ anupam.r2301@gmail.com — 📞 +91-83401 93910 — 📍 Patna — 🌐 Portfolio — 🐙 GitHub — 🔗 LinkedIn

PROFESSIONAL SUMMARY

Passionate Full Stack Developer with hands-on experience building and deploying MERN applications using React.js, Node.js, Express.js, and MongoDB. Familiar with React Native fundamentals for mobile app development and experienced in designing robust RESTful APIs, authentication architectures, and scalable database schemas. Skilled in working with PostgreSQL, Prisma ORM, and Mongoose for efficient data modeling. Strong understanding of responsive web development, modern JavaScript (ES6+), and clean, maintainable code practices.

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js, Responsive Web Design, Tailwind CSS

Backend Development: Node.js, Express.js, RESTful API Development, MVC Architecture

Databases: MongoDB, PostgreSQL

Authentication & Security: JWT Authentication, Role-Based Access Control (RBAC), Session Management

Tools & Platforms: Git, GitHub, Postman, Vercel, Netlify, Render, Docker (Basics), Agile/Scrum, Prisma, Drizzle

Programming Languages: JavaScript, Java, SQL

PROJECTS

OptiPIN – Social Media Web Application React.js, Node.js, Express.js, MongoDB, Cloudinary, JWT
Live Demo — GitHub

- Architected a Pinterest-inspired platform featuring stateful React interfaces and secure server-side JWT authentication middleware.
- Integrated Cloudinary cloud storage to manage media assets, reducing local server storage overhead and optimizing image delivery pipelines.
- Developed scalable REST endpoints within an MVC architectural pattern to handle real-time user feed interactions and content mapping.

BeatLab – Music Streaming Web Application React.js, Node.js, Express.js, MongoDB, Cloudinary
Live Demo — GitHub

- Created a high-fidelity music streaming platform supporting on-demand audio playback, user playlists, and relational item collections.
- Implemented a secure admin control dashboard enabling dynamic management, tracking, and modification of song and album models.
- Streamlined asset delivery networks using Cloudinary pipelines to serve low-latency media content to web clients.

Question-Answer Platform API Node.js, Express.js, PostgreSQL, Prisma ORM, Swagger
API Docs — Github

- Designed a robust backend service using PostgreSQL and Prisma ORM, structuring relational database models with optimized indexes.
- Implemented fine-grained Role-Based Access Control (RBAC) to enforce security layers across sensitive application endpoints.
- Developed comprehensive, interactive API definitions via Swagger UI, reducing integration testing cycles during development.

Digital Payment Platform API Node.js, Express.js, MongoDB, Mongoose, JWT, Swagger
API Docs — Github

- Built a modular financial management backend handling ledger tracking, transactional records, and user account balances.
- Implemented advanced Mongoose aggregation pipelines to calculate user spending metrics and deliver complex analytical endpoints.
- Enforced strict input validation and JWT verification routines to guard transactions against unauthorized payload manipulation.

EDUCATION

Bachelor of Computer Applications (BCA) 2022 – 2025

Dev Sanskriti Vishwavidyalaya, Haridwar

CGPA: 8.26/10

LEADERSHIP AND COMMUNITY ENGAGEMENT

- Participated in a month-long social awareness campaign in Churu, Rajasthan, conducting sessions in schools and colleges on cybersecurity awareness and responsible internet usage..
- Promoted awareness regarding substance abuse prevention, healthy lifestyle practices, and the benefits of yoga through community outreach activities.
